Dear Managing Financial Officer:

As a highly dedicated Business Analyst, I read your posting for the new Senior Business Analyst at London Machinery with great interest. Currently I work as a business analyst for a group of construction manufacturing companies here in London, Ontario. With my current role and prior positions, I've gained valuable experience that I believe aligns me well with the requirements for your position.

In my current role I'm expected to manage the implementation and support of business information systems, assist the corporate controller with financial close-outs, forecasting and statements, develop state-of-the-art business intelligence tools and review and analyze business analytics and search for potential weaknesses and opportunities.

I come with both a financial and technical acumen that has been directly related to the construction and manufacturing industry. From a technical standpoint I am fluent in Python and JavaScript programming languages as well as SQL, Power BI, and reporting software's like crystal reports and SSRS. I utilize these technical skills in a variety of different ways including; transforming & analyzing data, building ad-hoc business reports, automating workflows and migrating data between databases.

I am extremely enthusiastic about business, financial data and developing financial and statistical reports. I would be ecstatic to hear back from you and would love the opportunity to interview for the position.

Please review my attached resume for additional details regarding my expertise and career achievements.

Thank you for your time and consideration.

Sincerely,

Jason MacCuaig

Jason MacCuaig

Business Analyst

Profile

As an experienced business analyst looking for a senior position with an established corporation. I bring both a financial and technical skillset. I'm always looking for new ways to add value and find ways to keep business performing at it's peak levels. I'm fluent in two programming languages as well as SQL server, Power BI and Reporting softwares.
